Full-Stack Software Engineer — React / Next.js / React Native / Node.js / TypeScript / LLM Integration

EDUCATION

Shri Guru Gobind Singhji Institute of Engineering & Technology <i>B.Tech, Computer Science and Engineering (CGPA: 7.4/10)</i>	May 2021 – May 2025 <i>Nanded, Maharashtra</i>
Bajaj College of Science <i>Higher Secondary (Science) (94.67%)</i>	May 2019 – May 2021 <i>Wardha, Maharashtra</i>

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C/C++, SQL
Frontend: React, Next.js (SSR/SSG), React Native, Redux Toolkit, Tailwind CSS, HTML5, CSS3
Backend & Database: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Firebase
AI Integration: OpenAI API, Gemini API, prompt engineering, structured outputs
Cloud & DevOps: AWS (Cognito, Lambda), Docker, CI/CD, Git, GitHub
Developer Tools: Figma, Android Studio, Claude Code, GitHub Copilot, Cursor
Foundations: Data Structures & Algorithms, OOP, DBMS, Software Engineering

WORK EXPERIENCE

22nd Century Innovations Pvt. Ltd. (Housingram) <i>Software Engineer</i>	Nov 2025 – Present <i>Bengaluru, India</i>
- Built and shipped full-stack features across web (React / Next.js), mobile (React Native), and Node.js services for a real-estate ERP serving 500+ active users, with a reusable component and Redux Toolkit system that cut code duplication by ~25%. - Built full-stack OpenAI / LLM integrations (API design + prompt engineering) powering automated report summarization, lead qualification, and document data extraction — using structured (JSON) outputs for reliable, production-ready parsing. - Designed and built Node.js REST services for the Sales, Inventory, and Reporting modules — pagination, filtering, and role-based access control. - Implemented a custom AWS Cognito authentication flow (Lambda triggers) for builder onboarding and integrated Meta Lead Ads into the lead-generation pipeline. - Improved web performance by ~30% via SSR, code splitting, and render optimization, and set up OTA updates for the React Native apps for instant production fixes.	
Aeons Technologies Pvt. Ltd. <i>Software Engineer</i>	Dec 2024 – Nov 2025 <i>Nagpur, India</i>
- Developed and maintained production web apps, admin portals, and ERP systems using React, Next.js, React Native, TypeScript, Kotlin, and Jetpack Compose. - Built a Service Management platform used by 100+ active users, owning frontend development, API integration, responsive UI, state management, and scalable architecture. - Shipped a production Android app (Kotlin, Jetpack Compose) with animations, error handling, and performance optimization — reaching 5,000+ downloads within 2 days of launch while collaborating with senior engineers.	

PROJECTS

Competitor Intelligence Monitor <i>Next.js, TypeScript, Node.js, MongoDB, Gemini API</i>	GitHub
- Built a full-stack competitor-monitoring platform tracking Play Store, App Store, RSS, Google News, and Reddit via a hash-diff pipeline, with Gemini-based relevance filtering to cut noise from raw change feeds. - Designed a serverless cron architecture (external scheduler + Vercel background functions) with async job state to reliably complete long-running AI analysis within short request windows. - Implemented cross-source deduplication by matching stories across RSS and Google News using normalized titles, eliminating duplicate alerts for the same event.	
Krishimitra — Agri-Tech App <i>React Native, TypeScript, Node.js, Express.js, MongoDB</i>	GitHub
- Delivered real-time weather and APMC price updates to help farmers plan sowing and selling decisions, improving planning efficiency by ~25%. - Designed an e-commerce marketplace with customizable notifications, boosting direct sales by ~30% and lifting user engagement by ~40% through timely updates.
